THE REDCLIFF REVIEW • THURSDAY, JUNE 7th, 1931

Number 32

Recital Last Friday Delights Audience

Pupils of Mr. Knapper Put on
Excellent Program

Music lover. In Redcliff were delighted with the excellent showing made by Mr. Paul Knapper's youthful pupils at the recital in the Little Theatre here last Friday evening.

As Mr. Knapper devotes special attention to violin, guitar and harp lessons, most of the numbers were in these instruments and it was indeed an eye-opener to many present to observe the splendid manner in which these juvenile pupils conducted themselves and handled their instruments.

The pupils from Redcliff taking part were Dorothy Britt, Cyril Worts, Gordon Shenahy, Cyril Sangster, Horace O'Beah, Jack Learmonth, Oswald Swen, Fodwell Bell and Miss Frances Evelyn, all of whom did his and her part with credit to both themselves and their instructor.

During the evening Mr. Wm. Crtes, of Medicine Hat, rendered two excellent vocal solos which were thoroughly enjoyed by the audience.

Mr. Knapper is to be congratulated on the excellent progress his pupils are making.

ITALY TO FIGHT FOR HERSELF IN FUTURE

Premier Mussolini told 10,000 war volunteers that Italy will fight her next war for herself and not on behalf of any other nations pretending to be her allies.

"Italy's volunteers, if war is necessary, will shed their blood only for Italy," declared Il Duce. "Experience has shown them that it does not pay to help by hand and sea people who pretend to be our allies."

Mr. J. W. Vyant was a business visitor at East End, Sask. early in the week. He was accompanied by Mr. Hanson and Mr. Anderson and son of Calgary.

Miss Agnes Blair, of Delburn who has been visiting here with her aunt, Mrs. J. Hope, left for her home on Monday.

Bruce Woodcock has severed his connection with the Glass Plant here. He left on Tuesday for Calgary.

Mr. Mac Millard and son, Donald, who returned from the east, spent last week and here to visit Mrs. Millard, who has been visiting her mother, Mrs. Hicks, for the past month. They returned to their home in Castor on Monday. While in the east Mac and his son formed a meeting of four generations of male Millards.

The event of the season in softball is billed to take place to-morrow (Friday) evening when "Daddy" fans will meet the girl-team on the local diamond.

The Daddies have a good line up of husbands of the diamond game who are very anxious to show their agility and the girls say they are not afraid of the Big Baboons.

W. M. S. Celebrate Tenth Anniversary

Has Carried on Successfully
Since Organization

Gordon Memorial W. M. S. met in the schoolroom of the church last Thursday to celebrate the tenth anniversary of the formation of the society here. Mrs. W. Thacker, president of the society, reviewed the work done by the society since its inception in 1924 under the direction of Mrs. Paton. During these years the organization has carried on successfully and had been able to meet all its obligations. Five of the original members of the local branch were present at the gathering.

During the afternoon vocal solos were rendered by Mrs. T. Palmer and Mrs. L. Morton and refreshments were served. The large birthday cake with ten candles was much admired. The afternoon was a great success and much enjoyed.

Two of Mr. R. Peterson's dairy cows were bitten by rattlesnakes last week while grazing in the pasture. One of the cows died as a result and the other is still badly crippled.

JUST FOR FUN

She isn't as pretty as she is painted; her beauty is only skin deep.

Some people think that genius is hereditary and others have no children.

The most promising of all careers is that of a politician.

The girl who marries a man with money to burn usually makes a good match.

Why is it that they always speak of a doctor "practicing"?

ADDITIONAL LOCAL ITEMS

Mr. Egan Johannsen who sustained a crushed arm while driving a plowing outfit at Standand a few weeks ago is now able to resume his work.

Mr. Knudsen has located a farm in the Bonnyville district north of Edmonton. His family will leave for their new home in July.

Mr. Haas Peter Johannsen of Binville, was a visitor in town on Tuesday. He reports a great improvement in crop conditions since the recent rains.

Miss W. R. Winslow, of Medicine Hat, accompanied by her sisters, Mrs. D. Macdonald and Miss E. Davidson, both of Winnipeg, were guests of Mrs. Rutherford and Mrs. R. C. Hargrave on Tuesday.

Three out-fits of covered wagons passed through town last Saturday. They were farmers from Saskatchewan who are taking up land in the Tilley irrigated district. In the procession were a number of cattle and horses.

Rev. Dr. G. W. Kerby visited the High School Wednesday morning in the interest of Mount Royal Junior College of Calgary of which he is Principal. This college is the University of Alberta in seven subjects. This year Dr. Kerby said, Rev. L. E. Pow took Dr. Kerby to Brooks and Duchess where he spoke to the High School pupils.

Miss Margaret Pow, who last week, attended the Alberta Conference of the United Church as a lay delegate from Gordon Memorial Church gave a splendid report of the conference at the morning service last Sunday.

Last Sunday, St. Barnabas Church, Medicine Hat, celebrated its 50th anniversary. Canon Western was the speaker at both services. Between thirty and forty from St. Ambrose attended the morning service. Rev. Mr. Hammett assisted.

Last week Mrs. Olivia Dionne of Corbett, Ont., gave birth to five baby girls all at once. The quintuplets are all still living and doing well. The father has received an offer of \$250 a week and all expenses to show the quintuplets at the Chicago World's Fair.

Rev. E. Erskine Pow attended the annual meeting of the Ministerial Association which was held in Medicine Hat on Monday.

Don't forget the annual sale of fancy work and home cooking to be held in the I. O. O. F. hall on Monday afternoon June 11th under the auspices of Vega Rebekah Lodge. There will be whisky and tea will be served.

While at his work laying brick in one of the furnaces at the Glass Plant, Albert Tester met with a nasty accident. A large brick, 9 in. by 12 in. fell about ten feet and struck him on the top of the head making bad gash which required several stitches. Although badly dazed for a while Mr. Tester was able to return to his work after having the wound attended to by Dr. Ward.

Miss Carol Selhorn entertained the members of the Junior badminton club at a delightful garden party at her home on Saturday afternoon last. The young people, some twelve or fifteen in number, enjoyed an afternoon of games and a thrilling treasure hunt climaxed by a delicious supper served on the capacious lawn which at this season is surrounded by a riot of bloom in the perennial beds.

Sky Line Trail Hikers

"To Yoho we will go" is the slogan of the Sky Line Trail Hikers for the coming season and the dates fixed are Friday, August 2 to Monday, August 9 which will enable those taking part to go, if they wish, on the Trail Ride (July 31-30) or participate in the Annual Camp of the Alpine Club of Canada (July 15-31) and follow on with the Trail Hike. Plans at present are to meet at Emerald Lake Chalet on the morning of August 1, starting for Yoho Valley, returning to Twin Falls Cabin. The fourth day there will be a hike over the high line trail back to the Yoho Valley Chalet-Burnaby Camp seven miles distant. The first night will be spent in that camp and the morning hike on the second day will be to Twin Falls. In the afternoon there will be a hike over the upper meadows, to the Yoho Glacier. Camp for this hike and also the second night will be at the Twin Falls Cabin, supplemented by tent accommodation. The third day will be spent hiking through the Yoho Valley, returning to Twin Falls Cabin. The fourth day there will be a hike over the high line trail back to the Yoho Valley Chalet-Burnaby Camp seven miles distant. The first night will be spent in that camp and the morning hike on the second day will be to Twin Falls. In the afternoon there will be a hike over the upper meadows, to the Yoho Glacier. Camp for this hike and also the second night will be at the Twin Falls Cabin, supplemented by tent accommodation. The third day will be spent hiking through the Yoho Valley, returning to Twin Falls Cabin.

Redcliff Young Couple At Hymen's Altar

Davies — Podesta
A quiet yet pretty wedding took place on Saturday afternoon June and at St. Ambrose Church when P. Y. third daughter of Mr. and Mrs. J. A. Podesta of Redcliff became the bride of Mr. R. E. Davies also of this town.

The bride who was given in marriage by her father, looked lovely in a wedding gown of pale pink silk net with white accessories and carried a large bouquet of pink Opella roses.

The bride's bridesmaids, Miss Emma Podesta, sister of the bride, and Miss Ellen Hope, niece of the groom, made charming attendants, in ankle length gowns of green organdy and blue point d'esprit respectively.

The groom was assisted by his brother, Mr. John Davies. After the ceremony, a reception and wedding supper were attended by forty or more relatives and friends at the home of the bride's parents. These were followed by a social evening and dance when the music was provided by Mrs. L. Reid of Carmichael and Mr. Paul Knapper of Medicine Hat.

Mr. and Mrs. Davies will reside in Redcliff.

F. S. Grisdale New Minister of Agriculture

Was Former Head of The Olds Agricultural College

F. S. Grisdale, M. L. A. former head of the Olds Agricultural College, has been appointed Minister of Agriculture in the Alberta government. It was announced by Premier Brownlee. The appointment is effective at once. This change has been treated with surprise.

At the Alberta Conference of the United Church held in Edmonton last week, Rev. R. E. Pow was appointed First Assistant Secretary.

Redcliff Reminiscences

Taken From The Review File of June 11th, 1915

The first Redcliff boys mentioned in the casualty list are Bill Neale and John Bradley. Both are reported wounded badly seriously.

Mrs. W. Wheeler, Mrs. Chadwick and Miss Gibson are attending the W. A. convention in Medicine Hat this week.

Births—McCleary—In Redcliff on Monday, June 7th, 1915, to Mr. and Mrs. John McCleary, a daughter. Guest—on Saturday, June 5th, 1915, to Mr. and Mrs. S. E. Gust, a son.

"Investigation into Town's Affairs Was a Regular Farce." This was the heading on the report of the investigation held by Judge Carpenter at the request of several ratepayers.

Trucks, manufactured in Redcliff, are giving entire satisfaction to those in Calgary who purchased them.

Rains End Drouth Fears in Alberta

Crops and Prairie Greatly Improved Locally

The fine rains last Sunday at Monday, with intermittent showers since, have greatly improved crop conditions and have made a wonderful change in the appearance of the prairie and its lush lands.

The rains were general in this district and as a result many farmers are now preparing to put more land in crop.

Recent rains throughout the province have removed drouth fears, and many farmers, where crops had already been ruined by drouth and wind are going to re-seed.

On the whole crop conditions are now much more promising throughout the whole province.

"David Harum" at Monarch Monday

Noted Star Reported in Perfect Role in New Fox Film

Next Monday, at the Monarch Theatre, Fox Film will answer the request of thousands of theatre goers and present Will Rogers in "David Harum." The insistent demand of the public urging Rogers to play the role of this famous character of literature virtually forced the Fox Film officials to forego any other plans they might have had for the comedian.

The screen play, following closely the typically American theme of the novel, concerns itself with the life of a shrewd and ruthless horse trader. But a young man who is employed as a teller in the Bank owned by the horse-trader, learns of his concealed sympathy for the poor and realizes that underneath his hard crust he really has a soft heart. Because of the boy's hesitations to propose marriage to a wealthy girl with whom he is deeply in love. The horse-trader's efforts to help the romances are unsuccessful. Upon the advice of the horse trader, the young man places all his money on a horse the young girl has entered in a race. The film is said to come to a happy and amusing conclusion as the horse-trader tries his own hilarious method to bring the horse across the line a winner.

TWO KNIGHTHOODS COME TO CANADA

Two knightships came to Canada among the King's birthday honors, both going to scientists. Dr. Frederick G. Banting, Toronto's noted discoverer of the insulin treatment for diabetes, was named a Knight Commander of the Order of the British Empire. Charles E. Saunders, V., former Dominion cerealist, who developed the famous strains of wheat known as Marquis, Ruby, Reward and Garnet, became a Knight Bachelor.

Mrs. W. Cox, of Calgary, who early in the week. He was Mr. and Mrs. J. Podesta, for the past few weeks, returned home on Tuesday.

ORANGE PEKOE BLEND

"Fresh from the Gardens"

Music Festivals, And Spring

The music festival season, whether by accident or design, coincides with spring in this Western country; and it is peculiarly fitting that it should. The two seasons are highly compatible.

Spring is essentially the season of song—the joy of new birth, of life freed from the trammings of winter, of new hope and refreshment, of the seed-time and the filling and bursting of the buds, of the urge to new endeavor, of faith and a more expansive contentment. The pagans of old celebrated its advent with rites in which music was the vehicle of expression of that mirth and jollity the nature man inspired.

The association of spring with song is universal—has been universal down the ages; for in the spring, nature awakes from long hibernical sleep to the notes of its own orchestra and the song of its own choirs. What more fitting then than that the soul of man should "listen in singing" when spring brings life anew to prairie and woodland?

The music festival idea has given point and purpose to man's urge to vocalise the finer aspects of his emotional existence and experience. The remarkable growth of this idea in prairie communities, indicated in the consistent expansion of the festivals, is one of the most reassuring evidences of the enduring quality of the social organization these communities reflect. The joy of singing and the love of music, however, are not to be appreciated to the full unless they are shared, are infallible knitters of closer ties of friendship and fellowship. The association thus cemented inures to a deeper sense of that brotherhood of man which makes the whole world kin.

Song is of the heart and of the spirit—a weaver of the very fabric of community life. Music symbolizes the harmony of which life is compact and without which it cannot long survive. It is significant that visitors to rural communities of the prairie have been struck with the fulsome of the social life obtaining there, despite the lack of those adjuncts which are considered indispensable to the amenities of city life. This feature has been remarked upon particularly in relation to the remoter communities where residents have learned to rely upon their own resources and their own facilities for social organization, and where, in co-operative endeavor, they have managed to add spice and variety to their ordinary routine.

Music and song have thus become the greatest adjuncts of peace and contentment among the scattered communities of the far-flung prairie. They have contributed greatly towards the alleviation of the pangs of disappointment. They have made hardship less onerous, reaction less disruptive. These annual festivals, bringing, as they do, urban and rural dwellers of kindred tastes together, and demonstrating, as they do, a heritage common to the diverse peoples composing the population of the western provinces, are contributing much towards developing that fellowship which, wider than the communal, reaches through the provincial into the national life.

It is right that the winter should be a season of preparation and practice; but it is essential that the festival should be of the spring. That's where they belong.

Stowaway Makes Good

Boy On Antarctic Ship Has Become Popular With Crew

Fourteen-year-old Einar Lamber, who stowed away on the whaling factory ship Southern Prince, has made good. Einar was discovered when the ship was on her way to the Antarctic. He had crept into the ship the night she left Sandefjord, Norway, and hidden under a barrel until hunger forced him to reveal himself. The skipper admired the lad's pluck, and made him assistant steward. His quickness and resourcefulness made him the boy extremely popular with all the crew. In dark hours after a hurricane had smashed the rudder of the Southern Prince, it seemed certain that Einar would be lost with all hands. Einar proved his worth. His "bright" ideas came and utter disregard for danger helped the morale of the older men.

First Bills Of Lading

Were Short Compared To Woody Documents Of To-day

Bills of lading in the "good old days" of the sailing vessels were short and snappy as compared with the long details now printed in fine type on the back of such instruments.

A facsimile of a bill of lading issued in 1854 on the "good ship Meteor" from Boston to San Francisco released the ship and everybody connected with it from liability of all kinds in the brief liability clause which read in part: "The goods to be delivered in good order, in danger of sea and fire excepted." In other words, if it got there fine, and if not, it was too bad.

The camel is a native of the North American continent.

Shortness of Breath Weak, Sinking Feelings

If going up stairs, climbing hills, walking too far, if you feel short of breath, or if you have weak, sinking feelings, it is time you stop and get to the cause of your trouble.

What you should do is take a course of Milburn's Health Nerve Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of nerves.

Ask your druggist for Milburn's H. & N. Pills.

Sky Changes Coloring

At Different Altitudes

Moscow Experts Studying Records Taken In Stratosphere Flight

Remarkable evidence of changes of color in the sky at different altitudes in the stratosphere is one of the results which have been obtained by the camera in Moscow who are studying the records left by the crew of the Soviet stratosphere balloon Stratozest which crashed after reaching the record height of over 18 miles. Investigations are being carried on under the direction of M. Thoman, the senior scientific worker of the Central Weather Bureau. The gondola of the Stratozest carried numerous instruments for making automatic observations at various periods of the ascent and descent.

Among the data on which the experts have been working are twelve photographs taken at different altitudes, and twenty-seven spectrum observations.

The results of the preliminary investigations are stated to show that the sky gradually changes color as follows: 5.38 miles, marine blue; 6.83 miles, dark blue; 8.08 miles, dark violet; 11.81 miles, dark violet marine; 13.05 miles, dark violet gray; 13.67 miles, black gray.

This evidence bears out observations made by Professor Picard, the Belgian balloonist, and also by the crew of the Soviet Stratozest U.S.B.T., which made a previous high record attempt, who reported that the sky at 11.81 miles high was "very dark violet."

The experts state that valuable photographs of sky colors were made by M. Vassenko up to the time when a disaster overtook the balloon at a height, apparently, of 146 miles on the downward descent.

Wolves Kill Caribou

Trapper Brings Tale Of Wanton Destruction From North

Bringing stories of terrific onslaughts made by roving packs of wolves on the caribou, a trapper, Edwin Sunquist, trapper of the sub-Arctic, reached The Pas, Manitoba, following a nine months of travel west of Churchill.

Sunquist with his partners, John Ivanichuk and Charles Hendrick, left last July with supplies for winter trapping 165 miles north of Brochet.

They travelled by canoe, and reached their headquarters on Oct. 11. During the trip they saw no caribou.

But on the morning after their arrival, they went outside to find the migrating herds passing their dead. Thousands of animals were moving south. Following close on their heels were packs of from five to 25 wolves. Sunquist said the wolves in many cases killed purely for wantonness, and when they were not deer to knock down, they turned on each other.

Organ Built By Blacksmith

Donated His Work And Instrument

Only Cost \$200

After four years' work Thomas J. Hoskins, blacksmith, motor engineer and organist, is completing a pipe organ of his own design. The instrument, 12 feet high, nine feet wide, and seven feet deep, was made at the forge, and in the garage, and the work of the blacksmith. Hoskins was organist at the Carter's Corner Methodist Church. The organ was whittled out, and the congregation was too poor to buy a new one. Hoskins bought an old instrument, and from it took pipes and layboards. Then he made 600 new pipes, from three inches to nine feet long. He bought 20 sheepskins for the bellows, and used 100 pounds of glue. He used 1,000 screws, 15 pounds of nails and much wood. The new instrument will cost \$200. Hoskins has donated all his efforts.

May Have Dual Vision

Scientist Thinks Can Adjust Eyes For Day And Night

Recent experiments conducted by the laboratory of the University of Colorado psychology department without meeting the usual fate of their kind in college courses have convinced Dr. Lawrence W. Cole, head of the department, that man has a dual vision, one for daytime and the other for twilight.

Dr. Cole announced that after two years of intensive experiments with the furry little animals, he had found that they could tell red from gray, but could not distinguish between two shades of gray.

The tall-growing hairy delphinoidea as popularly known in the laboratory can be raised from dead, easily, but, as they do not come true, anyone wishing to increase the stock of a special plant must do so by division of the roots of that plant.

Agricultural Notes

Many Items Of Interest To The Western Farmer

There are 680 genera of seed plants occurring within the Dominion of Canada.

The only broad-leaved evergreen tree in Canada is the balsam poplar. It is a small tree with thick leathery leaves and is found in the coastal region of British Columbia.

The sales of branded beef in Canada for the first three months of 1934 totaled 8,609,435 lbs., an increase of 1,145,555 lbs. on the corresponding period of last year.

The disagreeable odour of the Canadian skunk cabbage is believed to be for the purpose of attracting carnivore flies and thus securing pollination.

For the first three months of 1934, hogs graded in Canada showed an increase of 17,702 head over the corresponding three months of last year, namely, 635,358 in 1934; 617,656 in 1933.

Plantings of potatoes in Canada in 1933 increased one per cent., namely, 527,700 acres as compared with 521,900 acres in 1932, while the average yield was 78 cwt. per acre as against 76 cwt. per acre in the previous year.

The Canadian potato crop for 1933, according to the Markets Extension Division of the Dominion Department of Agriculture, as indicated by the Bureau of Statistics at 41,296,000 cwt., an increase of 5 per cent. over the 1932 production of 39,614,000 cwt.

The problems confronting the cheese industry in Quebec are quite similar to those in Ontario. In both provinces, declining volumes of production has had a tendency to raise production costs per unit of product manufactured. The Economic Analyst.

The minimum temperature reached in winter in Canada is of great importance in determining the distribution of plants, more particularly in the case of shrubs and trees. Herbaceous plants are often prostrated from the effects of severe cold by a covering of snow. Division of Botany, Dominion Department of Agriculture.

In the shipments of livestock from Western to Eastern Canada during the first three months of 1934, cattle, calves, and sheep showed an increase, and hogs a decrease, compared with the corresponding period of last year, figures for the latter being within brackets: cattle, 21,188 (7,642); calves, 148 (18); sheep, 32,125 (26,140); and hogs 63,387 (62,306).

The inclusion of rough unsuitable types in the majority of the cattle shipments to the United Kingdom in 1933, especially during the winter when grass-fed cattle were loaded, was disappointing, writes the Canadian animal products trade commission in Great Britain, and it is as serious to the reputation of Canada as export.

The European apple sucker was first discovered in Canada at Wolfville, N.S., in 1919, and since that time has spread generally throughout Western Nova Scotia, as well as to the eastern section of New Brunswick and Prince Edward Island. To prevent further extension of this pest, a quarantine has been maintained on the known infested counties. This means that fruit grown in New Brunswick located outside of the counties of Westmorland, Albert, Kings, and St. John, may not procure any of the host plants from these counties, or from the provinces of Nova Scotia and Prince Edward Island.

Have Never Seen Rain

Because of drought there are children ten years of age in South West Africa who have never seen rain. They have been discovered by the Minister of Lands who reports that rain has not fallen for seven years in some districts.

In their natural state the ruby and the sapphire are identical in composition, their difference in color being due solely to naturally included metallic oxides.

SOURD ON THE WORLD?—THAT'S LIVER Wake up your Liver

No Calomel necessary

Many people who are suffering from indigestion, constipation, and other liver troubles, are told to take Calomel. But this is a dangerous and unnecessary remedy. The liver is the most important organ in the body, and it is essential that it should be kept in good health. Sourd is a natural and safe remedy for all liver troubles. It is a powerful laxative, and it is also a tonic. It will cleanse the liver, and it will strengthen the system. It is a sure cure for all liver troubles, and it is a sure cure for all indigestion, constipation, and other liver troubles. It is a sure cure for all liver troubles, and it is a sure cure for all indigestion, constipation, and other liver troubles.

More Tobacco for the Money! and POKER HANDS. too with TURRET FINE CUT!

Wise smokers who "roll their own" cigarettes are making 10c do a bigger job than ever before. They're using Turret Fine Cut—the mild, cool, fragrant tobacco that gives them more and better smokes for the same money and POKER HANDS to exchange for free gifts.

A turn to Turret Fine Cut is a turn in the right direction: a greater economy, greater pleasure and the extra value of POKER HANDS. Don't wait!

It pays to "Roll Your Own" with TURRET FINE CUT CIGARETTE TOBACCO SAVE THE POKER HANDS

Figures Show Improvement

Average Value Of Canadian Farm Stock Has Increased

The average value of farm land in Canada in 1933, including both improved and unimproved land as well as dwelling houses, barns, stables and other farm buildings, was placed at \$24 per acre in an estimate recently issued by the Canadian government. This shows no change since 1932. Average farm land values range from \$63 per acre in British Columbia to \$16 per acre in Manitoba, Saskatchewan and Alberta.

Average values placed on farm livestock are: Hens and turkeys, \$31; cattle, \$17; sheep, \$4; swine, \$8.89. The changes from 1932 values are slight except in the case of swine, which have almost doubled, having increased from \$4.73 to \$8.89. In the same period the average value of wool increased from five to ten cents a pound. Total value of all farm livestock in 1933 amounted to \$463,135,000, an increase of about \$7,500,000 over 1932. The value of farm poultry is placed at \$33,465,000, a slight falling-off from the value in the previous year.

Average wages of farm hands during the summer season were \$17 per month for men and \$10 per month for women, board and lodgings, in both cases, being furnished by the employer. Counting in the value of the board, the average wages for men were \$32 per month and for women \$22 per month.

Of recent years, a number of promising smooth-skinned hairys have been produced by various plant-breeding institutions, including the Dominion Experimental Farms, but these varieties have not yet been tested and it is difficult to say to what they are of value to the farmer. For the present, however, the variety called "Violet" is favoured in Eastern Canada, while Regal appears most promising in the West.

Island's capital is named Reykjavik, meaning smoking harbor, after the hot springs, which are so prevalent in the country.

The dabbie should not be placed until all danger from frost is over.

35 feet of white or coloured paper for kitchen use—covering shelves, lining drawers, etc. Appliques, PAPER PRODUCTS, MONTREAL, QUEBEC

Future World Peace Will Be Assured When Nations Learn To Live And To Let Live

The following article, being an editorial on war, appeared in a recent issue of the *Hottel's Magazine*.

Anyone who believes that from the beginning of time the World War was fated to come in is in a tragic position even to hope for a warless world. But he who regards all wars as a direct consummation of policies of participating nations, can build an optimism around a conviction that men, being thinking animals, need not forever blunder into bloodbaths but some day will consciously choose courses of action that prolong peace.

Wars do not happen suddenly. They are made in time of peace. Then popular desires are shaped into national policies which conflict and eventually clash with those of other countries.

It is interesting to conjecture what might have happened if, say in 1900, peoples of the 27 nations that were drawn into the holocaust of 1914-18 had clearly realized that the policies then being born would lead to this conflict. Perhaps, in considering whether the national aims should be pursued unmodified, far-reaching ones might have stated the case thus:

"These policies will lead to war. That war will take 30,000,000 lives, cost \$400,000,000,000, destroy the morals of civilization, precipitate a world-wide depression.

"If these policies are not pursued, 30,000,000 lives will be saved, civilization will proceed without interruption. And with the \$400,000,000,000 we shall be able to give a \$2,000 a house, furnished with \$1,000 of furniture, and five \$100-a-year for every family in the United States; Canada, Australia, Great Britain, Ireland, France, Belgium, Germany and Russia; to put a \$50,000 library and a \$10,000 university in every city of 20,000 population in the countries named; and, furthermore, establish a school for every child, and pay for all time pay a \$1,000 annual salary to 125,000 teachers and 125,000 nurses."

With the question so posed, it would seem to us certain that the nations of 1900 would have been willing to sacrifice even cherished national aims for the benefits of peace. But would they? With thousands of millions men yet living and fleets of merchant vessels running in harbors to remind us of the cost of the last war, we of 1924 are permitted to believe that some day nations will be able to lead to the "next war"—a war that admittedly will bankrupt civilization.

It can, of course, be avoided at a price. The price is that nations learn how to live in peace. Even though it involves relinquishing of what in an early day of relations between individuals was called "rights." Men of goodwill will continue to believe that some day governments have weighed the case, will elect to do this.

Find Them Expressive

Many Americans Miss Terms Found in Oxford Dictionary

However rude or crude are American terms, they are so expressive and impudently near the truth that it is very hard to resist giving them a place in any honest lexicon. Such terms are "graft," "once-over," "footprint" and "step on the gas." This was the explanation given by President George Gordon of Magdalen College, Oxford, England, for their inclusion in the new supplementary volume of the Oxford Dictionary. Among other phrases which have been introduced into the English language in the last 50 years and given a place in the dictionary are "all of a doo da" and "give it the once-over."

Freezes The Flavor

Government scientists, who have been experimenting with the freezing of vegetables to preserve them, report that in all cases the flavor and general appearance of experimental lots of frozen vegetables were superior to vegetables canned by the usual heat process, both before and after cooking.

Asked As Bombering

Hill by its own torpedos, fired in naval manoeuvres at Hens Bay, Sweden, a vessel was considerably damaged. The torpedos were defective and completing a circle, struck the ship from which it was fired.

Points In Rose Planting

Necessary To Make Sure That Roots Have Not Become Too Dry

When new rose plants are received, it is important that the roots should not be allowed to dry out under any circumstances. It is a good practice when opening the parcel of rose plants to plunge the roots into water and leave them there for several hours, or to bury the plant, root and branch, in moist soil for a few days. Either of these practices will restore the moisture in the stems that has been lost during the winter season.

Hybrid tea roses should be planted about 18 inches apart; hybrid perpetuals, two and a half to three feet; and the rugosa hybrids, the moss roses, and other large-growing hardy sorts about four feet apart. It is necessary to prune back severely, and the bushes should be planted deep enough so that the point of the union between stock and action is from two to three inches below the surface of the soil. That is important, because, if the union is at or very near the surface, the sun shining on it will dry the wood and prevent a free circulation of sap which is not desirable as a strong vigorous growth is necessary for best results.

Roses need an abundance of moisture and the surface of the soil should be kept loose from spring until midsummer. In each rain the rose bed should be hoed or raked, leaving a rather loose surface, or during a dry time, if it is necessary to water roses, the soil should be loosened after watering. It is better to water roses thoroughly occasionally, than to give them a light watering frequently.

The First Coal Mines

Fits Were Shallow And Coal Was Obtained By Tunneling

Coal first came from the British Isles on the south shore of the Firth of Forth. For centuries there were no means of draining coal pits, and early coal was obtained in hilly districts, where it could be reached by tunneling. In some places shallow pits were dug, and in 1719 the deepest coal mine in the country was only 360 feet deep. Gun-powder was first used in blast coal in that year. In pits where fire-damp accumulated, it was exploded each morning by "a regular man of purpose," who went down clothed in rags saturated with water and provided with a long pole at the end of which was a lighted candle. There was no form of safety lamp until the year 1815.

Make Good Messengers

Scotland's Girvan Pigeons Are To Be Dependend On

Scotland's "wonder" birds, Girvan pigeons, are superior to the radio for transmitting messages from the light-house keeper at Ailsa Craig to the lighthouse, according to Archibald B. Girvan, boatman of the Northern Lighthouse Commissioners, who takes the birds every Tuesday to Ailsa Craig. When the keeper wishes to get in touch with Girvan he releases one of the birds. It immediately makes for home carrying a message in an aluminum container. Under favorable conditions it flies the 10 miles in 15 minutes, but it is sure to arrive no matter how severe the weather. "I believe there is no service quite like this one in the world," says Girvan.

Has Overcome Obstacles

Hats off to Eleanor Gertrude Brown of New York who, in spite of being blind from birth and burdened by poverty and sickness, will graduate from Columbia University with the degree of Doctor of Philosophy. When some of us think we are having a hard time think of Miss Brown, who has made stepping stones of what most of us would count insurmountable obstacles.

Limited To Praties

The commercial production and demand for brone, western rye, and created wheat grass seeds is practically limited to the Prairie Provinces, where last year 800,000 pounds of brone, 225,000 pounds of western rye, and some 3,000 pounds of created wheat grass commercial seeds were produced.

A new type of aerial camera which will take pictures automatically from the aeroplane wing at intervals of six seconds, has been perfected. The views are assembled later into one continuous film.

Facts About Cyanamid

New Fertilizer Provides Nitrogen Quickly For Plant Use

Because of the numerous inquiries re Cyanamid, the Department of Chemistry, Ontario Agricultural College, believes that there is a certain amount of error in the minds of some farmers regarding this new fertilizer. The plain statement of fact is that Cyanamid is a valuable carrier of nitrogen, supplying 22 lbs. of N to the 100 lbs. but it is not a complete fertilizer. The nitrogen from Cyanamid is rapidly available for plant use. It promotes stalk and leaf growth, and is especially valuable for meadows, pastures, orchard trees and garden crops harvested in the green state.

Moreover, in every 100 lbs. of Cyanamid there is lime equivalent to 70 lbs. of hydrated lime which corrects the acidity of the soil and makes conditions favorable for the growth of clover, alfalfa and other legumes; and for such garden crops as cabbage, asparagus, lettuce, onions and asparagus.

In asparagus growing it has been found that Cyanamid applied at the rate of 100 lbs. per acre will actively kill weeds while they are young and tender and will improve the asparagus. When used for this purpose it is best applied broadcast while the weeds are damp with dew.

The manufacture of Cyanamid is of great interest to the farmer. It is taken from the air. Eighty parts out of every 100 parts of the air we breathe is nitrogen; this is equivalent to over 80 million lbs. of nitrogen over every acre of the earth's surface. In spite of this abundance of nitrogen in the atmosphere the growing crop cannot make use of this supply unless the nitrogen has been combined and supplied in such carriers as Cyanamid and other forms of nitrogen-bearing fertilizers, or is fixed in the soil by nitrogen-fixing bacteria, or is applied to the soil in the form of waste products of animal and plant life. By the use of electricity it was found possible to combine calcium and limestone with carbon and with nitrogen from the air forming calcium cyanamide. This forms a gray-colored product which is marketed in granular form.

For best results, Cyanamid should be worked into damp soil as soon as possible after its application—Bull's O. A. C. Guelph.

Policy Is Wrong

Situation Made Worse By Helping Farmers With Handouts

Hon. Duncan Marshall, who was Canadian commissioner of agriculture in 1922, asserted that most of the farmers' troubles would be over if governments would "stop trying to make farmers rich with handouts" and instead educate them to use resources of their farms to the best advantage.

Governments can help the farmer, he said, by doing something to reduce the two things "which have helped to destroy the farmers of your country and mine—their laziness and their ignorance."

He was addressing the Chicago Association of Commerce.

A method of keeping orange juice in cold storage without sterilization has been perfected at the Florida Agricultural Experiment Station.

Winnipeg Newspaper Union

By Ruth Rogers

665

AN ADORABLE NEW CAPED

AND A KEEPER DRESS

It has the cape sleeves so a la mode, sun back and wrapped skirt which allows plenty of freedom for motion.

Lovely schemes in cottons, linen and tub silk can be worked out and adapted to this model.

The sleeves can be of self-material, if you prefer.

Style No. 665 is designed for sizes 11, 13, 15, 17 and 19 years.

Size 12 requires 3 1/2 yards of 30-inch material with 1 yard 30-inch contrasting.

Price of pattern 20 cents in stamps or cash (cash is preferred). Wrap card carefully.

Like Ocean Travellers

We are like men and women who peer the decks of ships at sea; we seem to come back again and again to the place of our departure, but while we have been moving we have come into new latitudes and longitudes and the constellations themselves have altered their relationship to the journey on which we started. All this is part of the deep meaning of life.

Rhubarb may be propagated from seed, but as the identity of the variety is likely to be lost through cross-breeding in the fertilization of the seed, it is better to propagate by transplanting sections of the root.

Canada And United States Relationships To Be Studied By The Carnegie Endowment

Holland Destroying Cattle

Hopes To Put Dairy Industry On Paying Basis

The mania for peace prosperity by wholesale destruction of valuable property is extending to Europe. A plan has been authorized by the government of Holland whereby two hundred thousand head of valuable dairy cattle will be slaughtered in an effort to put the dairy industry on a paying basis.

A central body has been organized with government authorization and it is empowered to impose a levy on all cattle slaughtered in Holland. The returns from this go into a central fund and this fund is again used to purchase cattle for slaughter, the milk and by-products being sold at 100 per cent on behalf of the central organization. It is said that the number of cattle in Holland in 1925 was 1,432,311.

Some economists profess to see in the destructive methods that are applied to industry throughout the world the possibilities of an eventual famine. It is certain that these methods are contrary to all the principles of thrift which have been taught in the past.

What Interested Him

Frenchman Not Admiring Young Lady As She Thought

A time creature who returned recently from Paris has told us of a grand passion she encountered in the Cafe de Paris, where she lunched alone one day. A handsome Frenchman at a nearby table kept glancing at her while she opened a card of mail she had just received from America, the glances apparently becoming progressively warmer as she proceeded. When she was about to leave, having paid her check and got out of his life forever, it was too much for the boulevardier. He approached her, bowed, and said:

"Madame, will you be so gracious as to permit me to remove the stamps from your letters?"—The New Yorker.

Artificial Rain

Experiments Being Carried Out In Russian Areas

Artificial rain was produced in the neighborhood of Achhabad in Russia by scientists who have been experimenting to obtain this effect. With the aid of chemical compounds they produced a fog on a sunny morning and as the wind carried this across the fields it deposited drops of dew on the soil. The same method will draw rain from a cloud, the scientists state.

These results are of great significance for in the great stretches of Turkistan and other areas in the U.S.S.R. days on which rain and snow fall over this area usually total but 100, leaving more than two-thirds of the year dry.

Clothes mottos were brought to America from the Old World.

Strange Phenomena Of Nature

Remarkable photographs of kind ever made, have been obtained by a photographer at Debrecen, Hungary. The views may prove of considerable scientific value in studying the strange phenomena of Nature's phenomena. Few places in the world are better suited to the observation of mirages than this Hungarian landscape. Almost level plain rimmed by higher land.

Strange apparitions appear above the horizon, and are seen through a morning mist. Greatly magnified, church steeples and houses are visible. The strange apparitions appear above the horizon. Even distant carriages and railroad trains, normally invisible, come into view as mirage spectacles. Sometimes the visions appear half-submerged by water, as in a flood.

The explanation of these strange images is to be found in the fact that layers of hot and cold air, having different refracting or light-bending powers, may deflect rays of light reaching an observer from a distant object and give a false impression of its distance and size.

In some cases the air layers act like a telescope lens and enlarge as well as elevate distant objects. In parts of Central Australia, where the landscape is bare and wide, illusions of trees and islands can be seen.

Engineers of the Canadian government have used the mirage in measuring distances across large bodies of water. This new system of measurement is based on the fact that refraction over water is always greater at night and distances are measured which are invisible in the daylight can be seen at night by the use of light on the distant shores.

In the Georgian Bay district of Ontario, some stations built by measurement purposes cannot be seen from other shore stations during the day, but at night strong electric lights make the stations visible. After four o'clock darkness makes possible better sight of the distant station, and at night this becomes still better. Armed with figures on the refraction of light, the engineers are able to calculate the distances accurately.

Generally speaking the soil requirements of soybeans are similar to those of corn. A soil too acid for soybeans will often produce a good crop of soybeans.

MARY PICKFORD RETURNS TO THE CITY OF HER BIRTH

MARY PICKFORD RETURNS TO THE CITY OF HER BIRTH

The famous screen star, Mary Pickford, went home to Toronto, the city of her birth, recently, and was accorded a tumultuous welcome. It was her first visit in many years and was made at the special request of Toronto, which is this year celebrating the centenary of its incorporation as a city. Above us seen Miss Pickford as she responded to the various tributes tendered her at the civic luncheon in her honor, while at the right is a view of one of the enormous throngs that crowded the city hall to participate in the civic welcome given there to the popular star.

The Week at Ottawa

Ottawa, May 31st, 1934

The Companies Act of 208 Sections was revised this week. Many weak points were brought to light but it seemed to be difficult to get them corrected. Millions of hard earned dollars have been lost owing to fake promotions, high pressure salesmen and fraudulent sales. Many family Companies got into the hands of promoters. These men, expanded the companies by issuing stock far in excess of the real value of the assets. They themselves reaped a rich reward but this water stock made such a great capital debt that in poor times dividends were passed.

Years ago business was done by individuals, later partners worked together and still later small stock companies were formed. Now most of the business is done by large corporations with thousands of shareholders. Without any doubt many senior shareholders of these big institutions have been very greedy and grasping. They have taken large salaries themselves regardless of the welfare of the shareholders, the employees or the consumers of their product.

The Marketing Act is an Act to improve the method of selling natural products at home and abroad. It has been debated for three weeks and many changes have been made in it. A Dominion Board will be set up in Ottawa to regulate the time and place of selling. It will determine the quantity and grade that may be sold and may prohibit sales.

A number of producers may petition the Minister to set up a scheme for marketing any product. If approved, the local people elect a Board and every producer must market through this scheme. The Minister may himself set up a Scheme in any district.

The Governor-in-Council may restrict or prohibit the import or export of any commodity concerned. This was opposed as it takes from Parliament the control of the tariff.

The Local Boards act within a province and the provinces may decide on the marketing agency. The Dominion Board looks after export and interprovincial trade.

The Minister may investigate cost of production, price spreads between what the grower gets and the consumer pays, trade practices, policies, grading, transportation, etc. Any one who receives an excessive spread or is convicted of other unfair practices may be punished by a fine or imprisonment.

Best for You and Baby Too

OCCASIONAL WIFE

By EDNA ROSE WEBSTER
Author of "Jettie", "Lazette"
and "Gertie"

SYNOPSIS

Camilla, Hoyt and Peter And young and in love, marry secretly, decide to live their own lives until Peter is able to provide for them. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and is studying commercial art in the hope of landing an agency job. Others in the story are Peter's mother, a wealthy girl who is trying to win Peter, Sylvia, Peter's model, and Gus Matson, his former roommate with whom he quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and they find another boy are standing near them. This makes it necessary for Peter to announce before the party that he and Peter are married. Camilla and Peter are reconciled. After a visit to Peter's mother, who introduces Peter to well-known artists and public men.

(Now On With The Story)

CHAPTER XLV.

"A title is always very important," Avis observed, and turned to Camilla. "Don't you think so?" It has so much to do with the success of a book or play or picture. And it does with a piece of sculpture also. It should strike the public's imagination, as well as being appropriate to the subject."

"Of course," Camilla agreed. She reflected that she probably knew more about that than Avis did. "Wasn't that her object in her work—to attract the public eye with a few well-chosen words? 'Have you anything in mind?'"

"Several," Peter nodded. "But I've been so busy getting the unnamed thing finished that I haven't given it much thought. No one has any name, however alluring, without an object to go with it."

"I had an idea the minute I saw it," Camilla explained. "That the word 'Inspiration' seems to me to fit it exactly. 'What do you think of it?'"

Camilla repeated the word thoughtfully. "It sounds rather well," she hesitated.

Avis recalled instantly. "Her displeasure over Camilla's semi-enthusiasm was almost visible. She turned to Peter confidentially. "Don't you like it better, the more you hear it? Doesn't it sound so good on you now?"

"I believe it does," he admitted, then turned to Camilla. "Have you a suggestion, dear? The committee is open to any new idea, and anxious for one."

"I've thought a lot about it," she confessed, smiling. "I have a list of ideas written down at home, but I don't see I have thought of 'Rage' Youth."

Silence for a moment, dominated by Titie's clashing of china and silver in the kitchenette. "Say, that's hot, all right!" Peter exclaimed. "Well, you say little excited—well, a whole lot of titles topped by a prize winner."

For EASIER Dyeing . .

The new Instant Kit is easier to use than any other hot or dry dye ever used. It dissolves completely in 40 seconds—no soaking required.

FREE! A full bottle of Instant Kit dye, a bottle of color fast dye, a bottle of color fast dye, a bottle of color fast dye, a bottle of color fast dye.

YOU'VE HAD BETTER LUCK WITH

NEW!

No longer a soap! Dissolves instantly.

ner and you haven't said a word! It was immensely pleased.

"I was waiting for you to tell me your own ideas first, so you wouldn't be influenced by mine," Camilla explained quietly. "I wanted the whole thing to be yours, title and all, unless you got stuck and I could help you."

"Gosh!" he enthused. "Am I in luck to have two women working together to name my statue? It ought to be good!" He turned to Avis. "What do you think of that one, 'Rage' Youth?"

"Very good," she agreed instantly, but she thought to herself, "I'll handle you, alone."

"Anyway," Peter decided, "we'll have another week to think it over. It won't take long to scratch the title on when it's finished. Both of you keep up the good work and we'll vote on the final selection."

Camilla remained with Peter for what was left of the night, but it was only four hours later that she resolutely left him to work and returned to her own apartment for a night of rest. She had to prepare her clothes for the following week and an afternoon nap that refreshed her for the evening when Peter came to take her to a movie.

It was entertainment which permitted them to relax as that of the evening was not so much, and although they were in a crowded theatre, they might have been engaged by the rest of the world, which they came close together in the darkness and watched the tragedy of human emotions on the screen evolve into the mists of happiness. Their own emotions had been tense in the crisis of those make-believe lives, and it was with relief that they witnessed the final dissolution of all strife and misunderstanding.

"They always live happy ever after," Peter murmured. "They should, after all that effort to deserve happiness. Not all stories end happily." "I like them," he said. "I like them, don't you?"

"I guess everyone does. Still, you remember the tragedies longer, I think. That's why a few authors dare to leave them that way. True to life, too. There are plenty of real tragedies in real life that never end in happiness."

"Yes, and the saddest ones are those we never hear about. The ones that end in failure, are not the real tragedies. The worst ones are lived behind smiles and service, in silence. But we are going to have a happy ending," she added cheerfully and contentedly.

"I'm sure," Camilla agreed quickly. "At least, we are going to give the controllers of destiny a fair struggle, I think."

"Just imagine, Peter, you may be in Paris in less than two months," she reminded him wistfully.

"I doubt it. If I do, I'll be earning some real money, though." "Always, the human mind is forced to invent," she said, smiling. "In terms, because the world ruthlessly demands that 'with the same means, you may make it, it shall be made.'"

"Always, the human mind is forced to invent," she said, smiling. "In terms, because the world ruthlessly demands that 'with the same means, you may make it, it shall be made.'"

"Well, aren't you thrilled to death to have the first thing in the actual project?" demanded Margaret. She was secretary to Mr. Weeks and had a profound respect for creative talent.

"Of course, I am," Camilla confessed. "But what shall I do about it?"

"Say, if that was my story, I'd make whoopee like an Indian—well, I don't know what I would do."

"That's just about the way I feel. That is why I don't do anything at all. They do look darling, don't they? They added fondly, quite as if anyone else had created them and she was admiring them."

"Do they? If that ad doesn't make the kids notice and demand Wheat-hearts, nothing will!" "I hope you are right," Camilla said quietly. Again, that standard of success confronted her. Her work would be praised or condemned according to the measure of its return measure to gold to her employers. Margaret's opinion did not make it good, nor the opinion of any critic.

If Past 45 and "Low" and Upset Look for Acid Stomach

HERE ARE THE SIGNS:
Nervousness Frequent Headaches
Indigestion Sleeplessness
Loss of Appetite
Acid Stomach
Auto-Intoxication

WHAT TO DO FOR IT:
Take a spoonful of
this in a glass of water
get up. Take another
spoonful in half an hour
after eating. And another
spoonful before going to
bed. This will keep you
from getting any more
acid in your stomach.

PHILIPS' MILK OF MAGNESIA TABLETS
You buy—50c and 50c sizes.

MADE IN CANADA
Each of these tablets is the equivalent of a teaspoonful of Magnesia.

Philips' Milk of Magnesia

But if that 'dickie composite mind that is known as public opinion, chose to favor her work with its passing approval, would then turn to gold for her employers and, in turn, gold for her—and she would be happy."

Camilla telephoned to Peter during her lunch hour. "Have you seen the 'Weekly Review'?" he asked. "I saw it. It was full of praise for your work."

"How famous?" he laughed. "Just among ourselves, for awhile." "Okay, honey. I won't lose a minute calling that magazine, you can bet. I'll tell you back later, and tell you what I think of this new Amazon article."

Camilla accomplished little that day. Every employee and executive had been summoned and would upon the initiation of the "Tiny Toys" into the world of affairs at large and advertising in particular. She was optimistic regarding their popularity, and Camilla walked again on clouded feet with her head in the clouds of hope.

Her elation was not obvious. If possible, she was more quiet and reserved than usual for deep emotion is not expressed in sounds and actions. It is lived within the heart and soul. Only superficial emotion manifests itself in violent demonstration.

Planes To Visit Toronto

British Air Force Sending Four To Centenary in July

A fleet of four planes of the British Air Force will take part in the Toronto centenary celebrations in the House of Commons by Sir Philip Spence, Under-Secretary for Air. The machines will be the Hawker Fury, the standard fighter of the early days of the Royal Air Force. They have a top speed of 30,000 feet of 214 miles per hour, and are extremely fast and maneuverable.

They are all-metal biplanes with a Rolls-Royce Kestrel engine.

It has been found that aluminum becomes stronger in the bitter cold of high altitudes.

Love is blind, marriage is a skillful oculist says the Brandon Sun.

Spain has excellent scenery for exterior cinema film.

MATURITY—MATERNITY

MIDDLE AGE
At these three critical periods a woman needs a medicine that will help her to keep her health and vitality.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND
This is a safe and reliable medicine for women of all ages. It is made of pure vegetable ingredients and is entirely non-toxic.

Squaring The Circle

Lawyer Claims He Has Solved Most Baffling Problem

The most baffling mathematical problem in history, which has vexed Pythagoras—how to square the circle—said to have been solved at last, Miller Popovitch, a mathematical lawyer, from Niah, claims that he has done it. He started struggling with it as a schoolboy. He continued his efforts when a prize offer of war. He has been at it ever since—in the spare time he could wrest from his professional duties. Reports that an American mathematician had left a considerable fortune to anyone who could solve the problem, spurred Mr. Popovitch on in his efforts to work out this outstanding proposition. Now, at last, he declares that he has found the solution, but before he will disclose his formula, he makes a demand that a common-sense solution be made by the executors of the American's will, shall examine him and be convinced that the circle has really been squared.

Tenants Steal Building

Remove It Piece By Piece To Split Landlord

Charged with stealing a building, seven tenants of a row of flats have been arrested in Rhodol, Poland. Back of this is a case of revenge against the rentmaster. Following a long series of clashes between the occupants and the owner, the tenants got together and decided to steal the building. Since the stone, door, or door, window by window, they removed their flats several miles and a search was started. After many days the flats were found. Inside were the tenants, enjoying life and a search was started. After many days the flats were found. Inside were the tenants, enjoying life and a search was started.

THE RHYMING OPTIMIST

By Aline Michaels

LUKE LAND-LOCKED SHIPS

When at the wharf I stand and watch the ships
Take the cargoes waiting at the shore,
See your loaded and giant cranes
Reel back and forth, their arms
Lifted high, their hooks
Sweeping the air, their
Sweeping the air, their
Sweeping the air, their

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet into a glass of water. Note that it bubbles and foams. This is the action of the Aspirin, which is started to work almost instantly.

What it does is this: it does it in a few minutes. Hence it is so effective.

Little Helps For This Week

"Odey my voice and I will be your God and ye shall be my people; and walk ye in the way that I have commanded you; that it may be unto you." Jeremiah 7:23.

And oft, when in my heart was heard
Thy timely nuptial, I deferred
Thy coming, for I thought I was
Too busy to be waiting for thee.

But that I now would serve
More strictly, if I may,
I pray thee, O my Lord, to stay.

I pray Him to give you what the scripture calls an honest and good heart, or "a perfect heart," and without waiting backs at once to obey Him with the best heart you have. Any obedience is better than none. You have to seek his face, even when he is the only way of seeing Him. All your duties are obediences.

To do what He bids is to obey Him, and to obey Him is to approach Him. Every act of obedience is an approach, an approach to Him who is not far off though He seems so, but close behind this visible screen of things which hides Him from us.—J. H. Newman.

As soon as we lay ourselves at God's feet we have enough light given to us to guide our own steps; as the foot-soldier who hears nothing of the war, but only of the course of the great battle he is in, but hears plainly enough the word of command, which he must himself obey.—George Eliot.

When Accidents Happen

Fatal Hour For British Road Accidents Is Between 5 and 6 P.M.

Between 5 and 6 p.m. is the fatal hour for British road accidents. It was shown in an analysis of accidents released by the ministry of transport which has been much concerned with the increasing loss of life.

Fatal accidents rise to a small peak between 7 and 9 a.m., during the morning, rise again between 12 and 1 p.m., drop in the afternoon and reach their highest point in the evening, which is the time of the day when most accidents occur.

This is only for working days. On Saturdays, Sunday and holidays most fatal accidents occur between 10 and 11 p.m.

Queen Mary Launches liner

The British government announces that the King and Queen hope to go to Glasgow at the end of September for a launch on the new ship, the Queen Mary. Her Majesty, the announcement said, will perform the actual ceremony of launching the vessel.

Improves cooking

It is a sign of prosperity, then it has arrived in Nova Scotia at last. Sydney merchants, restaurant proprietors and insurance companies, have been kept on a constant look to the banks to change the yellow-backs proffered by their customers for bills of smaller denomination.

Great Salt Lake in Utah is more than four times as large as the Dead Sea.

There are at least 60 stars to every man, woman and child on earth.

Interesting Local Items

King George celebrated his
sixty ninth birthday on Sunday.

It is reported that when Mae
West landed in England the
band played "God Save The
King."

Last Wednesday evening a
number of friends "dropped in"
on Mr. and Mrs. J. Kitchen to
join them in celebrating the 39th
anniversary of their wedding.
A jolly evening was spent dur-
ing which the bride and groom
of yesterday were presented
with a set of silver ten spoons.

Messrs. O. Wooding and Geo.
Thomson motored to Calgary
last Saturday, returning Sunday.
They were accompanied on the
return trip by Mr. Wooding's
brother, Peter, who will visit
here for a time.

Town Council sat as a Court
of Revision last Monday, even-
ing. Only a few complaints
were registered against the as-
sessments and in each case the
council upheld the valuation set
by the assessor.

3 p. m. Wednesday, June 13,
S. W. A. of St. Ambrose Church
are having a bridge and whist
drive. Bring your partner.
Usual good time, good prizes.
The tea; also a large assortment
of different styles of aprons for
sale, both pretty and useful;
reasonable; come and see.

School children from Beauty-
and Viewfield, near Bind-
les north of here, were treated
on an auto ride to Redcliff and
Medicine Hat last Friday. It
was an educational trip sponsored
by the teachers and parents.
While in Redcliff the children
were shown through the Glass
Factory.

The Bowell Community picnic
will be held at Petrified Coulee
next Saturday.

Mr. and Mrs. L. M. Reid, of
Carmichael were visitors 13
town last week-end, the guests
of Mr. and Mrs. Joe Podesta.

Mr. and Mrs. W. Carpeau
motored to Calgary last Friday
to spend the week-end with
friends there.

The longest drouth in the
United States in fifty years was
brought by snow and heavy rain
this week.

Wm. Sellhorn was the host at
a jolly dinner party on Tuesday
evening, the occasion being his
twentieth birthday.

Forty-five Canadians were
successful in drawing horses in
the Irish hospitals' \$9,000,000
sweep on the Derby. Four of
these were in Alberta.

Mr. C. S. Smith, of Trail, who
was in town on business in con-
nection with the Redcliff Green
houses, returned home last Sat-
urday. He was accompanied back
by L. R. Stone.
